SUPPLEMENTARY INFORMATION: At its meeting of August 21-25, 1995, the SAFMC decided to make changes in its proposed golden crab management program, which will be specified in a revised draft FMP. The SAFMC has decided to hold additional public hearings in order to solicit public views on the revised management measures for inclusion in the FMP.

The FMP management unit is the population of golden crab occurring along the U.S. Atlantic coast from the east coast of Florida to the North Carolina/Virginia border. Other deep-water crabs, such as red crab and jonah crab, are included in the FMP for data collection purposes only; no management actions are planned for these species under the initial FMP. Although all three species of crab are harvested in the Gulf of Mexico and Mid-Atlantic/New England, it is believed that the populations are sufficiently separated from one another to be managed independently.

The following types of management measures for golden crab are under consideration by the SAFMC for inclusion in its final FMP:

(1) Definition of terms, including: Optimum yield, overfishing, and crustacean trap;

(2) Gear controls, including: Use of traps only and a limit on their size, requirements for trap escape gaps, degradable escape panels, use of rope only as trap main line, and requiring that crabs be landed whole;

(3) Measures to ensure conservation of the fishery, including: No retention of females;

(4) Establishment of the following zones in the golden crab fishery:

(A) Northern Zone—North of the Volusia/Flagler Line (29° 25' N. lat.) to the North Carolina/Virginia border;

(B) Mid Zone—29° 25' to 25° N. lat.; and

(C) Southern Zone—South of 25° N. lat. to the boundary between the areas of jurisdiction of the SAFMC/Gulf of Mexico Fishery Management Council;

(5) Measures to limit access to the fishery. Criteria for access will be as follows: Apply an April 7, 1995, control

date to limit fishery access in the southern and mid-zones, and apply a date of September 1, 1995, as a criterion for limiting fishery access in the northern zone. Criteria for fishery access will be based on demonstrated landings from the Council's area of jurisdiction prior to the dates specified;

(6) Area restrictions, including limiting deployment of traps to depths of 900 ft (295 m) or greater in the northern zone and 700 ft (230 m) or greater in the middle and southern zones;

(7) Bait restrictions to protect snapper and grouper;

(8) Enforcement provisions, including: Vessel permits, and dealer permits;

(9) Collection of information requirements for science and research purposes, such as use of information from sales reports, and logbook requirements, and;

(10) Framework rulemaking procedures to provide administrative flexibility to change management measures in a timely manner.

The Council intends to finalize the FMP at its meeting in Wilmington, NC from October 23–27, 1995. The public will have an opportunity to comment at the full Council session before the Council takes final action to adopt the FMP's management measures. Once finalized, the FMP will be submitted to NMFS for review, approval and implementation. NMFS will provide for a 60-day public comment period on the FMP and a 45-day public comment period on the proposed implementing rule during its 110-day review period.

These hearings are physically accessible to people with disabilities. Requests for sign language interpretation or other auxiliary aids should be directed to the Council office by September 21, 1995.

For special accommodations regarding the hearings, contact the Council (see **ADDRESSES**).
